

Community Visual Survey

Purpose of Community Visual Survey:

The Community Visual Survey (CVS) is a planning technique that empowers community residents to become the planners and architects of their community's future. The CVS gives citizens of Mineral Springs, NC the opportunity to rate pictures of development types and styles. The survey provides valuable input by allowing residents to visually express what they like and dislike about development patterns and community design. The Town Council will use CVS responses to develop a representative vision for future growth and development.

Development Scenarios:

- Mineral Springs' character
- public space
- residential development
- commercial development
- town center
- streetscape and design
